Professional Summary

Computer Engineering student with a CGPA of 9.71/10 and skills in Java, JavaScript, Python and AWS. Built web applications through internships and projects. Smart India Hackathon 2024 National Finalist seeking a Software Developer role.

Education

B.E in Computer Engineering Savitribai Phule Pune University (SPPU) CGPA: 9.71	2023 – 2027
Maharashtra State Board of Higher Secondary Certificate (HSC) Percentage: 82.17%	2021 – 2023

Technical Skills

Programming Languages: Java, Python, JavaScript
Frontend: HTML5, CSS3, Responsive Design
Backend: Node.js, Express.js
Databases MongoDB, MySQL
Data & ML: Machine Learning, scikit-learn, Pandas, NumPy, Matplotlib
Concepts : AWS (EC2, S3, Lambda), OOP, Data Structures & Algorithms, CNS, DBMS

Experience

Data Science Intern – NITS - Analyzed and preprocessed 10,000+ record datasets using Python, Pandas, and NumPy, cutting data cleaning time by 30 pipeline scripts. - Built and evaluated machine learning models using scikit-learn for accurate prediction and data analysis. - Conducted EDA and built Flask-based web interface, enabling stakeholders to identify trends and make data-backed business decisions.	Jan 2026 – Jan 2026
Web Development Intern – Edunet Foundation - Built responsive web interfaces using HTML, CSS, and JavaScript with cross-browser compatibility. - Integrated RESTful APIs for dynamic content rendering.	Aug 2025 – Sep 2025

Projects

Bitcoin Price Prediction System - Built an end-to-end ML pipeline using Random Forest on historical OHLCV cryptocurrency data with feature engineering and GridSearchCV hyperparameter tuning. - Evaluated model performance using RMSE and MAE metrics; achieved reduced forecasting error and improved prediction reliability over baseline models.	Python — Machine Learning
AI based Feature Identification from Drone Images - Trained a deep learning model to detect and classify geographical features from high-resolution drone orthophotos using image preprocessing and terrain segmentation. - Automated the feature extraction pipeline, significantly cutting manual analysis time and supporting smart urban planning and infrastructure mapping use cases.	Python — Computer Vision
Blood Donation Management System - Implemented a PHP and MySQL based system to manage donor records and blood donation camps. - Developed backend logic for data validation, secure storage, and efficient retrieval.	PHP — MySQL

Certifications

- Data Structures and Algorithms in Java – Apna College
- MERN Stack Development – Apna College
- Data Analytics – Godrej Infotech
- AWS AI-Powered Cloud Engineer

Achievements

- Smart India Hackathon (SIH) 2024 – National Finalist among thousands of teams across India.
- Tech Pragyan 2025 – Participated in a National Level Hackathon, collaborating on innovative technology solutions.
- Smart India Hackathon (SIH) 2025 – Selected as College Level Finalist.
