Aspiring Software Engineer skilled in MERN stack, data science with AI/ML, and backend development. Strong in Java, Python, PHP, MySQL, JavaScript, and problem-solving with solid DSA foundations. Hands-on internship experience in web development and data science with a focus on real-world applications.

WORK EXPERIENCE

Data Science Intern (NITS) 01/2026 – 01/2026

- Built and evaluated machine learning models using Python and scikit-learn.
- Performed data preprocessing, feature engineering, and model analysis.
- Worked on real-world datasets and delivered insights through data visualizations.

Web Development Intern (EDUNET FOUNDATION) 08/2025 – 09/2025

- Developed frontend components using HTML, CSS, JavaScript, and frameworks.
- Worked with REST APIs for data integration and dynamic content rendering.
- Ensured cross-browser compatibility and responsive design standards.

SKILLS

- | | | | |
|-------------------------------|--------------|-----------|----------------|
| • Java | • JavaScript | • MySQL | • Scikit-learn |
| • Data Structure & Algorithms | • React.js | • MongoDB | • Git & GitHub |
| • Python | • Node.js | • Pandas | • APIs |
| | • Express.js | • NumPy | |

PROJECTS

Bitcoin Price Prediction System 01/2026 – 01/2026

Technologies: Python, ML, Random Forest Classifier, Flask.

- Implemented a machine learning pipeline for cryptocurrency price trend prediction.
- Conducted feature engineering and model evaluation using Random Forest.
- Deployed the predictive model as a web application using Flask.

Travel Explore 08/2025 – 09/2025

Technologies: HTML, CSS, JavaScript, APIs, Node.js, Express, MongoDB.

- Designed and developed a full-stack Travel Explore web application with API-based destination search.
- Integrated dynamic photo images using third-party APIs and built structured travel blog sections.
- Created a responsive image gallery to enhance user engagement.
- Implemented backend APIs using Node.js and Express for handling search and data operations.
- Utilized MongoDB for storing user searches and application data.

Blood Donation Management System 03/2025 – 04/2025

Technologies: PHP, MySQL, HTML, CSS, JavaScript

- Built a database-driven Blood Donation Management System with PHP and MySQL.
- Designed REST API and backend logic for donor and camp management.
- Ensured data consistency and secure handling of donor information.

CERTIFICATIONS

- DSA in Java – Apna College.
- Smart India Hackathon 2024 – Certificate of Participation.
- Tech Pragyan – Certificate of Participation.
- MERN Stack Development – Apna College.

EDUCATION

Bachelor of Engineering – Computer Engineering 2023 – 2027

Amrutvahini College of Engineering, SPPU
CGPA: 9.59

HSC (12th) 2021 – 2023

B.G.P Sahyadri Jr College — Maharashtra Board
Percentage: 82.17
